THE JOY OF HEARING found

KANSO™

Cochlear®

Hear now. And always

Introducing **KANSO**, the discreet
new hearing solution from Cochlear

KANSO

Kanso™ is an off-the-ear hearing solution that's so discreet it's barely noticeable, so small and comfortable you can forget you're wearing it.

A hearing solution that gives you the confidence to live your life to the full.

Kanso does this without compromising on hearing performance technology, so you can experience the joy of hearing even when high-powered hearing aids no longer connect you to your world. It's the discreet, simple and smart answer to the question, 'What else is there...?'

*"My self-esteem has gone
through the roof with Kanso!"*

- Alison V, Kanso recipient since 2015

DISCREET

It's small and worn off-the-ear

SIMPLE

Easy to use, you can set and forget

SMART

SmartSound® iQ with SCAN
and dual microphones

Only your expression gives Kanso away

Discreet HEARING

Designed for discretion and comfort, Kanso lets you enjoy life with confidence.

How? Because it is the smallest and lightest off-the-ear sound processor available¹. It is designed to fit snugly against your head for comfort and security, giving you the confidence to connect to your world. It's so small you can forget it's there.

Kanso also comes in a range of eight colours. You can choose the shade that best matches your hair – and your sense of style. It can blend in so other people will not even notice it.

A RANGE to match your hair colour

CHOCOLATE BROWN

BLACK

COPPER BROWN

SLATE GREY

GOLDEN BLONDE

SILVER

SANDY BLONDE

WHITE

Choose the colour of your Kanso for the perfect blend

KANSO hidden

— **SIMPLICITY** personified

Kanso has a robust, all-in-one design, with no cables and nothing on the ear to worry about. All you have to do is press the single on/off button, place the Kanso on your head and let Cochlear's industry-leading Nucleus® 6 technology take over.

Kanso automatically adjusts to your surroundings, helping you to hear at your best wherever you are. Because Kanso does all the work for you, you're free to focus on the things that matter.

"Having only one button makes it so simple to use. Usually I only have to push it twice: 'on' and 'off'!"

- Roger S, Kanso recipient since 2015

ON/OFF BUTTON

Smart **HEARING** from a small device

Kanso is from Cochlear, the world's most innovative hearing company³. It is the only off-the-ear sound processor to feature SmartSound iQ with SCAN⁴ and dual microphones.

This ground-breaking technology first appeared in the award-winning Cochlear™ Nucleus 6 Sound Processor. The benefits include crisp and clear hearing, particularly in noisy situations^{5,6}.

Cochlear implants provide around seven times better hearing performance than hearing aids⁷. And now, thanks to Kanso, you can enjoy that level of performance in a discreet, off-the-ear solution.

"It's so awesome. I would never have believed that I could just slip on a tiny button under my hair, and be able to hear pretty much perfectly."

- Kate O, Kanso recipient since 2015

KANSO hidden

Living the **KANSO** life

Kanso lets you find the joy of hearing, and it can also be used with other Cochlear products to bring your passions to life.

KANSO AND THE PHONE

By wirelessly connecting to a Cochlear Wireless Phone Clip, you can use a mobile phone like everyone else. Conversation is streamed directly to your Kanso.

KANSO AND MUSIC

Most people with hearing loss say that music is one of the things they miss most. With the Phone Clip, you can also stream music straight to your Kanso, with industry-leading sound quality and performance¹.

KANSO AT WORK, SCHOOL AND HOME

Cochlear Wireless Mini Microphones help you hear better over distance and in noisy situations. In fact, our study shows an 8 dB improvement hearing over distance in noise⁸. You can even use a Mini Microphone to hear at your best when getting out and active – from yoga to bike riding to tennis.

Sometimes it's good to just sit back and relax with a favourite TV show. Using a Cochlear Wireless TV Streamer, you can stream the sound direct to your Kanso. But because you are still able to hear everything going on around you, you won't miss out on any family chatter. It also means you don't have to rely on captions.

KANSO AND SWIMMING

With the Aqua+ for Kanso, you can swim, surf, paddle and play in water – hearing at your best in the wet.

By itself, Kanso is splash- and dust-proof. With the silicone Aqua+ cover, it is completely waterproof.

REMOTE CONTROL FOR YOUR KANSO

The Cochlear Nucleus CR210 Remote Control lets you adjust your Kanso's settings without having to touch the sound processor. This discreet, pocket-sized remote control has a handy display screen for ease of use.

How **KANSO** works

The Kanso Sound Processor works with a Cochlear Nucleus implant. The implant is an electronic device inserted into the ear in a straightforward medical procedure. Because it replaces the damaged parts of the inner ear, a cochlear implant can provide hearing when hearing aids can't.

- 1 KANSO captures sound and turns it into digital code.
- 2 KANSO transmits the code to the implant placed just under the skin.
- 3 The implant converts the code into electrical impulses and sends them down the electrode array placed in the cochlea (inner ear).
- 4 The implant's electrodes stimulate the cochlea's hearing nerve, which then sends the impulses to the brain where they are interpreted as sound.

• **KANSO** and the Cochlear implant range

Choosing a cochlear implant is an incredibly important decision. Your hearing is part of who you are, and your choice of implant and processor need to reflect your personality and needs.

Cochlear recognises that with hearing, one size doesn't fit all. It's why we make a unique range of implants and electrodes, underpinned by our philosophy of 'a perfect fit for every ear', for the best fit and best performance. Your hearing health professional can help you choose the right option to suit your individual needs.

The Kanso Sound Processor is compatible with all currently manufactured Cochlear Nucleus implants, and is part of our lifetime commitment to be with you throughout your journey to better hearing.

A+ HEARING

A+ hearing is only possible when you combine the four pillars of hearing performance; perfected over many years as the global market leader. This knowledge is further strengthened by the experience shared by more than 450,000 people we have treated since inventing the world's first cochlear implant nearly 40 years ago.

FOUR PILLARS OF HEARING PERFORMANCE

The Cochlear DIFFERENCE

Cochlear is the global leader in implantable hearing. Thirty years after successfully launching the world's first multi-channel cochlear implant, our commitment to innovation and providing hearing remains unchanged.

We pride ourselves on delivering the world's most reliable implants⁹. We also pioneered removable magnets, SmartSound iQ with SCAN and dual microphones – all reasons why more people choose Cochlear than any other implant brand.

Kanso is the latest example of Cochlear's innovation in action. Our technical expertise and lifetime commitment to our customers are combined to deliver this new hearing solution.

Hear now. And always

As the global leader in implantable hearing solutions, Cochlear is dedicated to bringing the gift of sound to people with moderate to profound hearing loss. We have helped over 450,000 people of all ages live full and active lives by reconnecting them with family, friends and community.

We give our recipients the best lifelong hearing experience and access to innovative future technologies. For our professional partners, we offer the industry's largest clinical, research and support networks.

That's why more people choose Cochlear than any other hearing implant company.
