Baha Wireless Accessories

Cochlear’s new wireless technology lets patients enjoy high quality audio streaming without the need for neck-worn hardware or other secondary devices — a truly wireless experience. The robust 2.4 GHz protocol provides a strong and reliable connection to a range of easy-to-use accessories designed to improve the hearing experience, even in the most challenging situations.

Baha 4 Fitting Systems

The Baha Fitting Software 4.0 is available through the Cochlear Software Distribution System (CSDS) using a downloadable link. Cochlear will also continue to distribute CDs for clinics that do not have or are unable to access the internet. The Baha 4 Sound Processor can be fitted wireless using the Airlink™. The BP100 and BP110 Power require cables that can be ordered as spare parts. Additional material such as data sheets, fitting guides or other promotional material will be available via a separate link or CD.

Baha Fitting Software 4.0 — Cochlear Software Distribution System (CSDS)

Please contact your local Cochlear representative to receive the link to the CSDS to download the Baha Fitting Software 4.0.

Available via download:
- Baha Fitting Software 4.0
- Baha Installation Instructions
- Baha User Guide

As the leading global expert in implantable hearing solutions, Cochlear is dedicated to bringing the gift of sound to people all over the world. For thirty years, Cochlear has pioneered this technology, helping more than a quarter of a million people reconnect to their families and friends.

Along with the industry’s largest investment in research and development, we continue to partner with leading international researchers and hearing professionals, ensuring that we are at the forefront of hearing science.

For our customers, that means access to our latest technologies throughout their lives, and the ongoing support they need.

That is why seven out of ten people worldwide who choose a cochlear implant choose Cochlear as their hearing partner.¹

Not everyone with hearing loss is a candidate for a Baha. All surgical procedures include an element of risk, and it is impossible to guarantee success. For complete information regarding the risks and benefits of a Baha procedure, please refer to the Instructions for use for the Baha implant available at www.Cochlear.com/US/BahaIndications
